USER STORIES

User Story	
No: 1	**Name:** Login
User: Seller, shopper	
Description: As administrator I want the application to have a login system so that users can enter their accounts.	
Validation: Checking that the credentials entered exist in the database, that they are correct and that they belong to a single user.	
Priority: High	

User Story	
No: 2	**Name:** Navigation
User: Shopper	
Description: As an administrator, I want the application to have the page enabled for everyone, so they can see the products and the information they want but, if they want to buy, they must have an account created.	
Validation: Verify that the aforementioned properties are enabled both for users who have an account and for those who do not..	
Priority: High	

User Story	
No: 3	**Name:** Roles
User: Administrator, Seller, Shopper	
Description: As an administrator, I want the application to have areas for this application, the roles of the application are the administrator, the seller, the shopper.	
Validation: Verify that the mentioned areas have different types of access and different types of control over the application for both the administrator, the shopper and the seller.	
Priority: High	

User Story	
No: 4	**Name:** CRUD Product
User: Administrator, Seller	
Description: As an administrator, I want the application to allow me to add, modify or delete my products so the customers can see any product they want.	
Validation: I can see that the information of the products has been uploaded correctly.	
Priority: High	

User Story	
No: 5	**Name:** Users Account
User: Administrator	
Description: As an administrator, I want to be able to manage the user accounts.	
Validation: Verify the information of all my customers and see the reports of the day in the bakery.	
Priority: High	

User Story	
No: 6	**Name:** Reports system
User: Administrator	
Description: As an administrator, I want the application to give me daily profits reports and daily inventory information, because I want to know how much I earn per day and how many products I have.	
Validation: I can see that daily profits reports match with the daily inventory information.	
Priority: High	

User Story	
No: 7	**Name:** Place orders
User: Seller	
Description: As a seller, I want the application to notify me about any special order that the customer wants. I want the customer could write in a "Place order" option, and the request will come to the bakery.	
Validation: I can see the customer's order in an "Customer's orders" option as a seller.	
Priority: High	

User Story	
No: 8	**Name:** Purchase
User: Administratos	
Description: As Administrator I want the application allows users to see the list of products they want to buy, the amount to pay and important information.	
Validation: Applying an algorithm that stores all the selected products together with their precious information, in addition to calculating the final amount.	
Priority: High	

User Story	
No: 9	**Name:** Sale
User: Shopper	
Description: As a seller I want to publish or remove a product from the online catalog.	
Validation: Updating the inventory and availability of each existing product in the database.	
Priority: High
